Visiting Researcher Presentation:

KIANA FRANK

Microbial Dynamics of Hawaiian Fishponds

Thursday, July 13, 2017, 11AM-12PM
University of Guam
Science Building, Rm. 101

Dr. Kiana Frank, native of Kailua, Oahu, is an Assistant Professor in Pacific Biosciences Research Center at the University of Hawai'i at Mānoa. Her research is focused on understanding how microbes interact with the environment and influence the functionality, health and sustainability of Hawaii's land and ocean resources.

Refreshments will be served following the presentation.
